## SUBJECT CONTENT – PROGRAM

During studio meetings the most important theme is Man and Object. Tasks in the studio are related to the observation and creation of the drawing matter – drawing the model and objects in different relations, including proportions and basic elements of the composition. Issues as: a point, a line, a surface, a blotch, an outline, texture, a colour, light and shade, are taken into consideration. A very important thing is a constant improvement of the individual technique and expanding the drawing medium. Within the framework of drawing classes there are also obligatory anatomy tasks, which are understood both traditionally and with reference to drawing „language“. Besides studio tasks, a student can implement her/his own themes or can choose a problem from the list below :
